

A

Regulatory (ENCODE-track-only) locus representation: Histone+DNase, native frozen

patient-independent | no beta values | no dense genomic annotations | unsupervised, fit on discovery chr1-19 (388,599 loci); chr20-22 transformed only

B

ENCODE family attribution DISCOVERY EVIDENCE (campaign), not confirmation

C

family screen 1 seed, batch 32, 30 ep.

confirmation 3 seeds, batch 8, 80 ep.

bars: seed mean; dots: seeds 17/42/97; labels: mean paired Δ vs Full, (arm-Full)/Full

D
