

A**GSE40279 (whole blood, 450K): 656 individuals**

train: fit frozen models (120 epochs, 3 seeds);
validation: checkpoint selection (best val MSE@0.50);

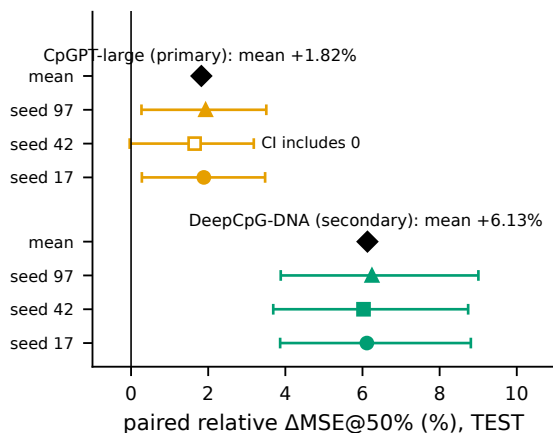

test: accessed ONCE after authorization
(tag external-recon-test-authorization-v1);
no retraining, no re-selection.

B

independent test (mean line, dots = seeds)

**C**

hollow marker: 95% CI includes 0

**D**

relative effects only; no absolute MSE across cohorts
